- **For mounting on sight glass fittings:**
This Ex-type sight glass luminaire is designed for universal applications and is ideal for use in combined sight and light ports (single-flange version) or with two separate ports (2-flange version).
- **The special advantages of Lumiglas LED technology:**
 - vibration-proof
 - long service life and operational reliability
 - continuous LED operation up to around 50,000 hours
 - optimal for fittings that are difficult to access
 - no heat radiation in the light aperture (cold light)
 - no unwanted additional heat in chemical and/or biological processes
 - extremely high-contrast illumination
- **Compact design, powerful light output:**
Glare-free illumination; suitable for circular sight glass fittings to DIN 28120/DIN 28121 or similar, for screw-type sight glass fittings in compliance with DIN 11851 and for sight glass fittings on flow indicators.
- **Application:** For illuminating visual flow indicators, pipelines, laboratory mixers, bio-reactors as well as the interior of tanks, hoppers, silos, agitators and other, normally closed, vessels and reactors in **potentially explosive environments**.
Gas: Zones 1 and 2, Dust: Zones 21 and 22.
- **Ideal for applications in sterile areas**
- **Protection class:** IP 65 and IP 67 acc. to DIN EN 60529
- **Operating conditions:** Independent of the internal pressure/vacuum in the vessel. On no account should a sight glass luminaire be used as a substitute for the cover flange or instead of the complete sight glass flange assembly or on its own to close a vessel port.
- **Lumiglas luminaires of this type are approved for use in ambient temperatures of between -20°C and +40°C.**
- **Optional with 10° or 25° light aperture reflector**
